

THE WORLD HASH DIRECTORY

14th Edition
published by

World Interhash 2010 Kuching, Sarawak Malaysia

Compiled by D2HD
(ably assisted by various regional helpers)

Designed and edited by HONKERS

FOREWORD

The details for hashes listed in this publication have been provided by the network of Regional Hash Websites who freely publish more details about Hashing for various areas that cover the entire world. Regional Hash Websites are maintained by Hasher volunteers who Hash in respective regions and are best able to share local Hashing knowledge.

If you are looking for up-to-date Hash information in a specific area first check the appropriate Regional Hash website. The summary of Regional Hash Websites is available in this World Hash Directory. An online listing is available on website <http://thehashhouse.org/directories> to show possible amendments.

This World Hash Directory publishes basic information about each Hash that runs regularly at least once a month. The information offered includes details of when the Hash meets, along with sufficient contact detail so intending visitors can establish precisely where.

Despite the huge effort to update all information prior to publication, many of the Hash listings are out of date. The 'Last update' reference for each listing gives indication of currency. Help Regional Hash Websites to update information by forwarding any amendments directly to the appropriate Regional Hash Website

Any information available about the origins of each Hash has also been included. Details of when founded, who the founder was and where the founder previously Hashed are critical when compiling the Hash Genealogy, a Hash Heritage Foundation project that was started by 'Tumbling' Bill Panton many years ago.

More details of Hash origins, including co-founders who may have assisted the founder, are published on <http://thehashhouse.org/genealogy>. Hash Genealogy is being continually researched. Make sure the records of your Hash are complete by providing any missing critical information to genealogist@thehashhouse.org

The Regional Hash Website approach has proved to be highly effective and well suited to the informal nature of Hash House Harriers. Providing a consolidated World Hash Directory at each Interhash provides just a snapshot of Hashing and motivates Hashers around the world to provide updates and verification for inclusion by a deadline. The World Hash Directory becomes a valuable reference when access to the internet is not available. Search engines offer volumes of websites on Hashing but so much of it is useless as many of the websites have not been updated for many years and not likely to ever be. The internet references within the World Hash Directory will be the most current as they have been reviewed as part of the general update process.

Thanks to the many Hashers from around the world who provided updates of Hashes to Regional Hash Websites before the deadline. Thanks to Honkers who transformed the basic Hash listings into a structured publication. Thanks to all the Regional Hash Website editors who packaged the information up into suitable formats so it could easily be processed.

Those who assisted in the Hash information collection process include Slumpy, Digit, Mr Peeeenut, Ra, Angel Lips, Room Boy, Organ Grinder, JR, Hazukashii, Condom, Liz Tan, Titanic, Peeking Ong, Railjerker, Spinning Dwarf, Cathusalem, Flashman, Likk'mm, Pampers, Baldrick, Bushbasher, Jeeves and Deep Throat.

On! On!

REGIONAL HASH WEBSITES

Hash regions are loosely defined so as to utilise a network of hash websites that offer hash directories covering the entire hashing world. Regional Hash Websites are maintained by hashers who actively hash in the various hash regions. A date when information was last updated for individual hash chapters/clubs is generally shown to give some indication of currency.

If you are seeking information about a hash in a specific region, check out the relevant Regional Hash Website below as well as this World Hash Directory as the presentation of information may vary. If you can provide an update for information published on a particular Regional Hash Website please advise the relevant Regional Hash Website directly. The first point of contact should be your Regional Hash Website as listed below but if you experience difficulties email hashdirectories@thehashhouse.org

Check out <http://thehashhouse.org/directories> to ensure that you are using the latest listing of Regional Hash Websites. The information below last updated: 20 May 2010
